FUEL

Biodiesel, Diesel or Red Diesel.

NO SMELL - NO SMOKE

All our heaters are equipped with small fuel injectors and advanced burner technology. Our pumps deliver a precise spray of fuel, burning an impressive 99.9% of it. Inside the heating pipeline, ceramic filters eliminate leftover odors and fine particles from the combustion process, ensuring a clean and efficient operation every time.

ADVANCED SOUND INSULATION

WELTEM's innovative silencing design significantly reduces noise, ensuring a remarkably quiet machine operation at a quiet 32dB. This guarantees an exceptionally quiet experience.

ADVANCED BURNER

The equipment includes an economical and efficient burner paired with an electric fuel pump, directing combustion gases through pipelines made from double-layered precious metal. These pipelines are further fortified with a ceramic coating, ensuring not only efficient heat emission but also increased resilience against wear caused by combustion.
